

VENTRITE INTERNATIONAL (PTY) LTD

FIRE VENTILATION SPECIALISTS

Ventrite International is based in Johannesburg, Gauteng and has infrastructure in Cape Town and Durban. We are a technology driven company with international trading status to undertake projects both nationally and internationally.

Ventrite International specialises in finding solutions for unique and complicated ventilation situations. We apply creativity, versatility and engineering intuition to offer practical and cost effective system designs and products for natural and fire ventilation installations.

With over thirty years engineering experience in the industry, we design, manufacture and install our fully patented world-class ventilation products to meet demanding specifications that will satisfy performance, aesthetic and economic criteria.

Sales Engineers and Technical Support staff will assist you to identify, plan, design and specify ventilation systems from our range of “fail safe” ventilation products. Our state-of-the-art CNC manufacturing equipment allows us to manufacture custom made products for non-standard ventilation solutions.

Our highly experienced Operations & Contracts Division are fully equipped to provide a turn-key solution, ensuring maximum control, greater efficiency and single source responsibility for the products, service and workmanship that we offer.

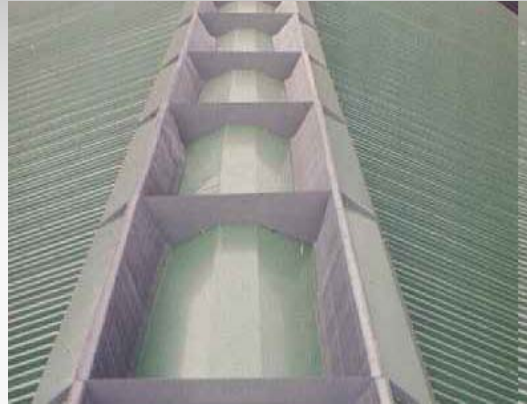

Ventrite International's mission is to provide total commitment to deliver quality products through continuous research and development programs and to ensure that our customers' requirements are met efficiently and cost effectively.
